

Cerebro 2020

ProjEx

About

This event is for participants to showcase their hardware and embedded skills through their projects. Participants can build their projects in hardware-related domains like robotics, drones, automation, AR, IoT(Internet of Things) or any other domain which can help to solve a real-life problem.

Rules and Regulations

- A team must contain at most 4 members.
- Winners would be decided by the judge and his/her decision would be final. No other queries in this regard will be entertained.
- The projects shall be evaluated on the following parameters:-

Parameter	Weightage
Project Idea and Originality	20%
Project Presentation	20%
Project Design	15%
Programming Aspects	15%
Project Demo Performance	10%
Practicality	10%
Scalability	10%

- Post-evaluation scores shall be granted by the judges from 0 to 5 for each category.
- A net score of the participant team shall be calculated by simply multiplying weights and scores for each parameter and then the sum will be the score of the candidate. Formula- $\text{Score} = (W1 \cdot P1) + (W2 \cdot P2) + \dots + (W7 \cdot P7)$

Indian Institute of Information Technology Vadodara

Cerebro 2020

- For multiple judges, the overall score of the participants shall be calculated as the sum of above-calculated scores for each judge.
- In case of any disputes, the decision of the organizers is final and binding.
