Ideathon

About

Ideathon is a team event where certain problem sets are provided and the respective teams have to brainstorm and find a technically feasible solution to the problem.

Rules and Regulations

- A team should contain 3-5 members
- Each team leader will receive a mail 3 hours prior to the first selection procedure which will contain the list of proposed topics. Each team must choose a topic from the given problem statements only.
- The mail will contain a link where you need to submit the chosen idea and its summary in the given format: http://bit.do/proposal-template
- Judges will select the qualifying teams based on their proposal. The selected teams will be notified through a mail which will also confirm their time slot for the final presentation. In case the presentation is to be done online, the mail will also consist of the Skype ID.
- The teams will present their respective ideas on the decided time slot. The presentation should cover aspects like the description and graveness of the problem, how their solution will benefit the society, how the solution is technically feasible, etc.
- Presentation tools can be used by the participants if required.
- The presentations can be done online/offline.
- The judges will decide the final winners on the basis of the criteria set by them.
- In case of any disputes, the decision of the organizers will be final and binding.
